

ConAgra Foods Lamb Weston to Expand Operations in Boardman, Ore.

March 11, 2016

EAGLE, Idaho--(BUSINESS WIRE)--ConAgra Foods, Inc. (NYSE: CAG) announced today that its Lamb Weston business will expand operations at its facility in Boardman, Ore. The \$30 million investment will add additional processing capacity for making formed products such as hash brown patties and potato puffs. The addition of the line at the company's existing facility is expected to add 50 jobs.

With continued increase in demand for frozen potato products domestically and internationally, and the increasing popularity of formed products, this capacity expansion is necessary to fulfill Lamb Weston's global growth projections. Construction on the state-of-the-art processing line is expected to begin in the spring, with completion in 2017. The added line will increase processing capacity by approximately 50 million pounds once complete.

"With the frozen potato category growing globally, we have tremendous opportunity to support our customers' growth in the US and around the world," said Greg Schlafer, President, Lamb Weston. "To capture that growth, we need to make more products. Expanding our operations in the Columbia Basin – with access to great potatoes, people and ports – just makes sense."

The facility in Boardman is strategically situated to support domestic prime growing, storage and shipping operations, and easy access to the initial expansion of the facility in June, 2014, adding 300 million pounds of capacity. The project included plans for the addition announced today in Boardman.

"Lamb Weston's planned expansion shows their continued commitment to the Mid-Columbia region as the right place to do business," said Greg Schlafer. "Our ongoing investments add good paying jobs to our Region and the Columbia River Port."

Lamb Weston is one of the largest employers in the Columbia River region. The company's corporate office and seven manufacturing facilities in the region employ over 1,000 people. ConAgra Foods operates 22 manufacturing facilities in North America, Europe and Asia.
